

# OUTLINING OPEN CONCEPTS

**delamora**  
— KITCHENS —

**delamora** Kitchens is the fruit of the collaboration of an entire team of fully qualified professionals specialized in the design, manufacturing and shipping of custom made kitchen furniture. This team has inspired the product catalogue in line with the up-to-the-minute trends and decorations, which enable interior fitting solutions to implement kitchens in open spaces, where functional areas should fit in elegantly.

Additionally, for over 40 year manufacturing and shipping furniture, we incorporate full equipped installations with the state-of-the-art technologies for its production.

Carefully selected materials, with multiple configuration options and flexible designs, help our specialists to appoint innovative proposals. We go further in offering you an open-minded ally willing to adjust the client's requirements.

Our products incorporate superior-quality components that make us stand out from the rest, certified by rigorous checks and stress-testing procedures. Environmentally-friendly manufacturing processes and preservation of natural spaces for upcoming generations to ensure the low environmental impact of the final product.

This catalogue will hopefully be an inspiration to keep growing together.

# CONTEMPORARY KITCHEN WITH ISLE

Kitchen completely merged with the homely environment. Range of colour in perfect coordination. Wood, ultra matt and no-fingermarks surfaces. Stay, move and live intensely in a refined and full of life atmosphere.

The iron mouldings in the tall units lighten the furniture and provide motion and functionality to the whole. The structure of this project enables multiple heights and widths compositions.

Tall cabinets feature the open decorative iron moulding in their lateral end. The broom closet door is enlarged to bring uniformity to the storage setting.

Personalized pull-outs and drawers with wooden sidelines, as well as the inner accessories, provide great elegance and heighten its functionality.

Accessibility, ergonomics and technology summarize the features of the inner accessories our furnishing are equipped with. In this picture the pantry Tandem eases the interior utensils organization ensuring they are always 100% easily accessible in a single step.

Its great storage capacity and versatility makes of it the ideal complement any modern kitchen should include.

# UNIQUE AND VERSATILE ATMOSPHERE

Within the last years our way of inhabiting a house has substantially changed. The kitchen as the central core of every day life, open to living areas plays an important role interchanging a homely atmosphere and a brilliant combination of materials and designs is a delectation to the touch and the sight.

Doors are furnished with devices to discreetly conceal breakfast appliances, decorative pull-outs and open shelving to display the glassware of passionate wine lovers.

Structured wood with its warm tonality, aluminium display cabinets and super matt white, stands in deliberate alignment in a subtle and fresh style. Pull-outs for kitchenware or other utensils, such as glass, flowerpot brackets, furnish this kitchen with our exclusive and personal attention to detail.

Pull-out cabinets with mechanical ejectors, without the use of electricity, provide a clean atmosphere and a very modern conception. Big handlers are used to reinforce horizontal and vertical lines and besides eases the wash disher and other built-in electrical appliances open-up.

The upper cupboards with multi positioning lift-up doors allow us to work in the most comfortable way.

The ventilation hood out of the sight leaves around a great storage surface. Retro-illuminated panels for knife-blocks, plugs, chopping boards, and other elements, provides elegance and contributes to a clear and functional working area.

A wide collection of materials and colours of our catalogue help us design living areas using shelving modules, wall units and any other piece of furniture to exude an exclusive atmosphere. The flexibility in manufacturing help us adapt our creativeness easily to each project.

WHITE | SMART CLOUD

In the breakfast cupboard with side-away doors we contemplate the colour matching and materials versatility we have at our disposal. Interior fittings fully adjusted to the customer's requirements. In this case plugs and internal lighting are essential to the kitchen's effective performance, with sideways concealed doors which eventually open out to reveal its interior.

Decorative openings with pull-out trays display their content where easily accessible storage solutions are essential.

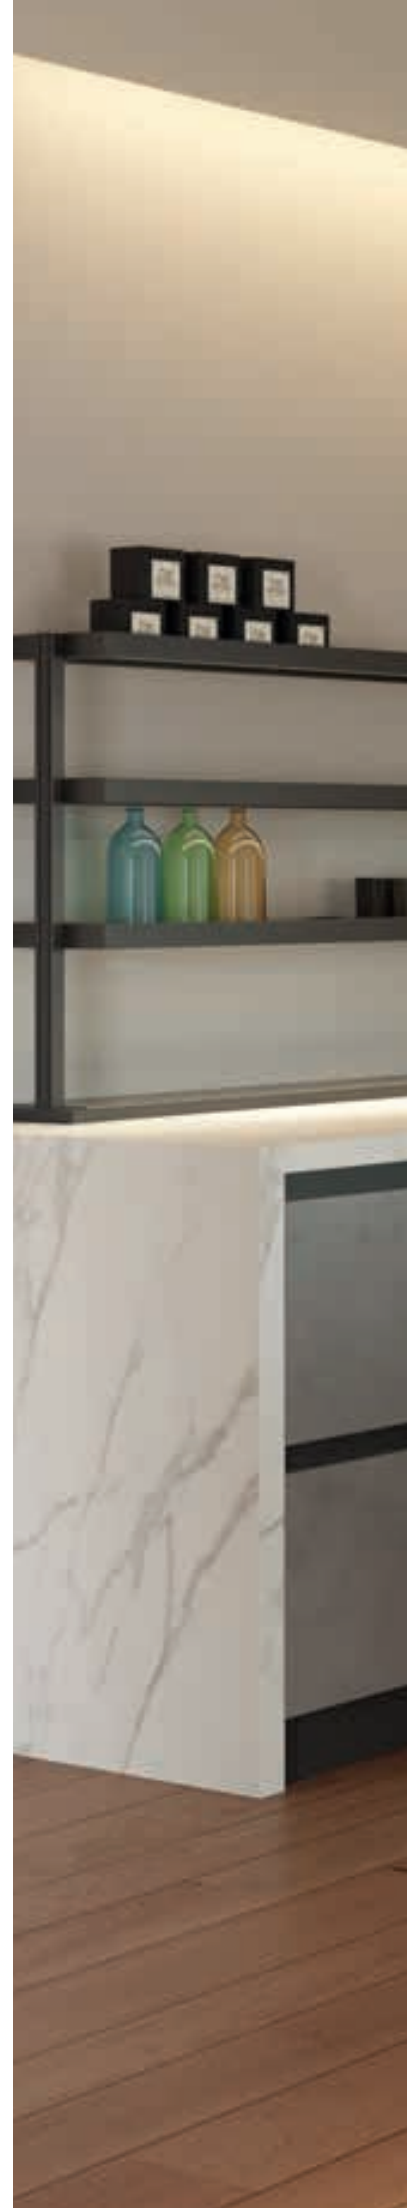

# HOUSE WITH INTEGRATED FEATURES

Metallic-looking materials have contributed in the evolution of the kitchen into the living space, halls, dining rooms and other areas of the house. The architectural element featuring open and closed aluminium display cabinets is a skilful way of dividing the room, both optically and functionally as the perfect continuation of the kitchen into the homely atmosphere. Creates visible axes of vision and sharing open spaces.

Multifunctional shelving as well as the glass display cabinets, create new storage units, exhibiting elements formerly hidden.

SENA LACQUER BRUSHED

Mobile furniture evolution refurbish the kitchen aspect into a functional area transforming the ambience with a single move. This system offers an open or closed planning through an oval wooden surface which turns into a table for breakfast or quick meals without being in the middle of.

Metal, stone, wood. A notable feeling of harmony is guaranteed when selected materials and colours interact one another. Atmospherically illuminated balances and vitalises. The wood, aluminium and the emerald illumination of its shelves complement the kitchen architecture appointed to cosmopolitan dwellings opened to new experiences.

## SENA LACQUER BRUSHED

Interior fittings of the corner tall units feature sizeable openings which enables to increase their storage capacity.

Pull-out trays can be taken out and permit full access.

The increment in the furniture depth and in countertops therefore, has led to new combinations in aluminium which ease and decorate the kitchen's back side. On the wall as well as inset they show great versatility such as: keeping dish-racks, hidden plugs, kitchenware, shelves for dinner service, spice containers, providing tidiness and functionality while bestowing our kitchen to stand out from the rest.

A growing concern for the environmental awareness and recycling, led us to integrate specific accessible features in the pull-outs located under the sink. This accessories also make room for the household cleaning products, always to hand in an ergonomic way.

Our catalogue feasibility enables the creation of adaptable furnishing to other parts of the house. In this skilfully interplay, in opposition to central display cabinets, the cupboard with glass front shelves and an interior wooden drawer enables the creation of a unique and delicate atmosphere providing the perfect finishing touch to the concept.

## SENA LACQUER BRUSHED

Detail of the wood which finishes the glass front shelves and the interior drawer, customizable in other materials and colours.

Pull-outs opening system through a fine flange-handle when the front is closed.

# KITCHEN FOR THE FAMILY

An eye for detail atmosphere, a place to share, live where the pleasure of cooking is a familiar moment.

Doors and fronts of this kitchen architecture are combined in a mixture of styles where tradition and modernity join to add movement to the surfaces. A house for family reunions, homely, bright, but also rich in materials and full of innovative planning solutions.

Each single detail has its importance. Both, ergonomics and beauty are harmoniously balanced and monitored to optimize the movements we do during kitchen work: preparation, service and tidying-up.

ARAN ELM AND LACQUER

Easily accessible storage solutions for daily cooking kitchenware by leaving an open block space integrated in the isle.

An additional space when preparing food, a breakfast... The oak lifted area in the isle exactly copes with its functionality.

The interplay of lacquered and elm display cabinets enhance the atmosphere with delicate elegance and depth. LED interior lights give the kitchen a homely and warm ambient light.

## ARAN ELM AND LACQUER

One of our proposals: a fully accessible storage centre with independent elements to be organised according to your needs.

The combined doors display what is inside and so do the glass fronts and sideways.

Sink furnishing feature different recycling systems to meet the customer requirements and location measures.

Corners solutions have been developed considerably in the last years. The anti-slip mat of the trays and a positionable block guarantee their right position when closing doors. The carousel let handiness and provides great storage capacity for food or kitchenware.

# INDUSTRIAL LOFT WITH LARGE ISLE

The architecture of this house encounters in this design exceptional solutions. The wood, as the centre of attention of this huge construction, in harmony with elegant matt-lacquered and aluminium, show off a warm and a functional aspect. Great volumes, necessary here, are lineally designed: on one side, tall units contain the refrigeration area, the utility storage and home appliances.

On the other side the isle with cooking and water, and a third one extending down to the dining with sizeable cabinets displays suitable for dishes and glassware.

Due to its great functionality and elegance aluminium display cabinets have become an indispensable part of kitchen planning. Either as tall units, top cupboards or as architectural elements to divide the room, they are highly adaptable to any emplacement suitable to the designer's open-configuration planning. The variety of colours, profiles and opening systems prospects, feature them as one of the best.

In this design display cabinets are structured in a tall cupboard to house our most valuable belongings in harmonious interplay with the set of table and chairs where celebrate our family and social reunions.

Wood interplay in different parts of the room infers as a perfect fluid visual balance. The warmth of fine materials oppose to the cement and anthracite grey selected for the isle.

Detail of tall units continuation by means of a wooden rail. The combinations of opening system, handle or handleless, increase each module possible featuring: integrate fridges and pull-out pantries with ergonomic handles.

The great iron decorative structure brings visual lightness and closes the wall while gives room to adorn and storage.

Another storage system to suit our needs in the base units are interior pull-outs with glass fronts and sideways. Cupboards of 60cm width have been furnished with three pull-out trays suitable for utilities, dishes, tablecloth...

Customizable cutlery and accessories tray. Natural wood finishing and slip-resistant mat are a harmonious combination of beauty and resistance

The evolution of storage systems means a step ahead to all those who appreciate the commodity of keeping always to hand and to sight the full pantry.

Electrical or manual, with a single movement, the storage centre which contains five pull out trays, displays its content.
